Beers

Limulax Red

Description

Limulax Red brewed on the Limulax home planet and is one of their major exports. The drink of choice for Limulax post-battle celebrations. Color suspiciously similar shade of red to human blood. Foam/head is extremely bubbly and will continuously bubble (bubbles look similar to when blowing into soapy water with a straw). Tastes like a sour style beer with a heavy iron flavor.

Tap Handle Appearance

An aggressive post-battle Limulax wrapped around tap handle.

Soma's Meatiocre

Description

Appearance is that of an average lager. "For the hardworking drone that can't be bothered to think, there's no choice but Soma's Meatiocre." Most popular beer among the blue-collar working class. Doesn't taste especially good. Packed with nutrients, and made with real meat (though the company has never specified what kind of meat). Many suspect (and are correct in this suspicion) that it contains chemicals/drugs that cause consumers to become more submissive, docile, and 'content'. Many companies have made this the default drink to serve at work functions as well as giving out coupons/ discounts for the beer in lieu of raises and bonuses.

Recommend that this be the default, starting beer.

Tap Handle Appearance

Very utilitarian. Simply has a creepily content smiley face.

Roy's Ale Tea

Description

A dark ale brewed with Cerenian tea leaves. The tea leaves used are known to cause hallucinogenic effects in certain races. The tea gives the drinker illusions of grandeur, commonly inflating their ego and causing them to believe they are entitled to high ranking social/political positions (ie royalty).

Tap Handle Appearance

Tap handle has the image of a bouquet of tea leaves adorned with a golden crown.

Green Ooze Booze

Description

Liquid is thick and viscous, more plasma than liquid in consistency. Literally oozes out of tap handle. Resembles Nickelodeon slime. In-game description hints at the origins being similar to Slurm from Futurama.

Tap Handle Appearance

Looks like green slime poured over the tap handle.

Rocket's Red Glare

Description

A spicy, fiery (literally) drink. Blasts out of the tap like a rocket. Spout turns red from heat. Appearance once poured looks like lava. Foam/head of beer looks like black smoke. Once poured, liquid appears to be constantly boiling.

Tap Handle Appearance

Tap handle looks like a rocket blasting off
